Dear Bob,

Know nothing about The War that Never was but from what you say it sounds interesting, part of what appears to be growing into a massive disinformation ploy of obvious beneficiary if not sponsorship.

Morrow, of course, is another. And McDonald. In all a long list by now.

Mailings worthwhile, thanks.

I do have an interest in FBI misdeeds not only because I sue them so much but because I'm after them for their files on me. That may go to court soon.

No, I'm not suing for the McCormack-Dickstein hearings. Once I had some of those volumes. Wish I had all now.

But among the suits is one for the remaining WC executive session transcripts.

Thanks and best,
